Detailed Description

... 102 is shown generally by the numeral 200. The web page includes a list of **questions** for a potential **job applicant** to **answer**. @ Generally, the **questions** require an **answer** in a 25 predefined form, such as "yes" or "no", "select one of the following", and "rate the following on a scale of 1 to 10". The **job applicant** selects an appropriate **answer** by **selecting** an appropriate radio button. Alternately, list boxes, drop down list boxes, check boxes and the like may be used for selecting an **answer**. Furthermore, the **questions** may also require **answers** in the form of phrases or paragraphs. The web page also queries the individual...scores. Such variations will be apparent to a person skilled in the art.

Once the **job applicants** have been **selected** for the following interview stage, they are provided with a user personal identification number (PIN...

...like. In the present embodiment, the second interview is used for providing further employment-related **questions**.

Once the job applicant calls the toll free number, he/she is prompted to enter...

...For the second category, the server uses the results of the retrieved questionnaire responses for **selecting** - 5 some of a plurality of **questions** available. For example, if a **job applicant** that has indicated on the Internet **questionnaire** that he/she is fluent in French, the system retrieves a **question**, presents it to the job applicant in French, and prompts the job applicant to **respond** in French. Other **questions**, such as position and location dependent **questions**, may be included in this category.

All of the questions are predefined and provided by...provided with a set of questions to answer, and is prompted for personal information. The **job applicant** **answers** the **questions** by **selecting** a button on a telephone keypad or by providing a spoken **response**. The **questions** are weighted and a score is determined as previously described. The system further determines whether...

Detailed Description

... automation of interview processes between individuals and  
organizations.

BACKGROUND OF THE INVENTION

The process of **screening applicants** for **employment** or a position in  
an  
organization is often initiated by submittal of written applications by  
...

...as personality and ability to orally communicate. Furthermore, written  
applications are vulnerable to misrepresentation. Consequently,  
**qualified** applicants are generally interviewed in-person, to not only  
gather additional information or to gage a persons speaking ability and  
personality, but to elicit spontaneous **responses** to **questions** about  
their **qualifications** , **responses** that allow interviewers to gage an  
applicant's knowledge, thinking ability, and command of the...

Detailed Description

Detailed Description

... powerful: they can flame up, but they can also flame out.

How does a person **screen** for relevance? An individual analyzes an externally-introduced intention on the basis of "fit" with the **person** 's **job** , role, or tasks within the organization. This **screening** may also occur at the team or group level: does the intended outcome fit more...  
...as intentions begin to be more deeply considered and processed by the individual, they are **questioned** at the level of values, beliefs, and norms.

Values are the deeply-held goals, ideals...
